

## INDEX

Sl. No	NAME OF EXPERIMENT	DATE	PAGE NO.
<b><i>Course Outcome 1 (CO1)</i></b>			
1	Advanced Use of GCC	08/09/2025	01
2	Familiarisation with GDB	12/09/2025	07
3	Familiarisation with gprof	12/09/2025	11
4	Different types of functions	12/09/2025	13
<b><i>Course Outcome 2 (CO2)</i></b>			
5	Array Operations	15/09/2025	19
6	Array Sorting	17/09/2025	27
7	Linear and Binary Searching	17/09/2025	30
8	Matrix Operations	22/09/2025	39
9	Stack using Arrays	04/10/2025	49
10	Queue using Arrays	04/10/2025	54
11	Circular Queue using Arrays	06/10/2025	61
12	Singly Linked List- Insertion	10/10/2025	68
13	Singly Linked List- Deletion	20/10/2025	83
14	Stack using Singly Linked List	20/10/2025	95
15	Queue using Singly Linked List	03/11/2025	102
16	Doubly Linked List- Simple Operations	10/11/2025	109
17	Doubly Linked List- Insertion & Deletion	10/11/2025	119
<b><i>Course Outcome 3 (CO3)</i></b>			
18	Implement Set Data Structure using Bit String	12/11/2025	132
19	Disjoint Set Data Structures	12/11/2025	138
<b><i>Course Outcome 4 (CO4)</i></b>			
20	Binary Search Tree Operations	19/11/2025	143
21	Red Black Tree Operations	28/11/2025	149
22	B-Tree Operation	28/11/2025	160
<b><i>Course Outcome 5 (CO5)</i></b>			
23	Heap Data Structure	01/12/2025	165
<b><i>Course Outcome 6 (CO6)</i></b>			
24	implement BFS and DFS on a connected graph.	01/12/2025	169
25	Implement Prim's Algorithm for finding the MCST	03/12/2025	175

26	Implement Kruskal's algorithm using Disjoint sets for finding the MCST	06/12/2025	178
27	Implement Dijkstras algorithm	06/12/2025	182
